

Is your MENZSHED safe?

An Automated External Defibrillator (AED) is a safe and easy-to-use machine which is used to treat Sudden Cardiac Arrest (SCA).

Fact 1. Every day SCA kills 12 New Zealanders whose lives could have been saved by an affordable, easy to use device.

Fact 2. Survival rate is less than 1% using CPR alone.

Fact 3. If an AED is applied within 3 minutes, 75% of SCA patients will survive.

ARE YOU WILLING TO TAKE THE RISK?

SCA can affect anyone of any age, background and fitness level – it does not discriminate, and gives no warning when it will strike.

With average emergency service response times increasing, having an AED onsite will make the difference between life and death for yourself, members or visitors to your MENZSHED.

LifePoint Pro AED Package

RRP: \$1,895 + GST

Contact us on 0800 2 DEFIB (33342)
